🚀 পরবর্তী পদক্ষেপ

আমি আপনার জন্য কী করতে পারি?

1. Complete Backend API লিখে দিতে পারি (MongoDB models + Express routes)
2.

React Frontend Components লিখে দিতে পারি
3.
File Upload System (APK/eBook upload + download)
4.
Authentication System (JWT based)
5.
Search&Filter functionality

ok, backend work:
